

JRE - 602- Junos Routing Essentials

Course Overview

This one-day CLASSROOM course provides students with foundational routing knowledge and configuration examples, and includes an overview of general routing concepts, routing policy, and firewall filters.

Through demonstrations and hands-on labs, students will gain experience in configuring and monitoring the Junos OS and monitoring basic device operations. This course uses Juniper Networks SRX Series Services Gateways for the hands-on component, but the lab environment does not preclude the course from being applicable to other Juniper hardware platforms running the Junos OS. This course is based on Junos OS Release 12.1R1.9.

SPANISH EDITION: This course is available with Spanish labs.

Objectives

- After successfully completing this course, you should be able to:
- Explain basic routing operations and concepts.
- View and describe routing and forwarding tables.
- Configure and monitor static routing.
- Configure and monitor OSPF.
- Describe the framework for routing policy.
- Explain the evaluation of routing policy.
- Identify instances where you might use routing policy.
- Write and apply a routing policy.
- Describe the framework for firewall filters.
- Explain the evaluation of firewall filters.
- Identify instances where you might use firewall filters.
- Write and apply a firewall filter.
- Describe the operation and configuration for unicast reverse path forwarding (RPF).

Intended Audience

This course benefits individuals responsible for configuring and monitoring devices running the Junos OS.

Course Level

JRE is an introductory-level course.

Prerequisites

Students should have basic networking knowledge and an understanding of the Open Systems Interconnection (OSI) reference model and the TCP/IP protocol suite. Students should also attend the Introduction to the Junos Operating System (IJOS) course prior to attending this class.

Course Contents

Day 1

Chapter 1: Course Introduction

Chapter 2: Routing Fundamentals

- Routing Concepts: Overview of Routing
- Routing Concepts: The Routing Table
- Routing Concepts: Routing Instances
- Static Routing
- Dynamic Routing
- Lab 1: Routing Fundamentals

Chapter 3: Routing Policy

- Routing Policy Overview
- Case Study: Routing Policy
- Lab 2: Routing Policy

Chapter 4: Firewall Filters

- Firewall Filters Overview
- Case Study: Firewall Filters
- Unicast Reverse-Path-Forwarding Checks
- Lab 3: Firewall Filters

Appendix A: Class of Service

- CoS Overview
- Traffic Classification
- Traffic Queuing
- Traffic Scheduling
- Case Study: CoS
- Lab 4: Class of Service (Optional)
